

## **Specifying Cold-Formed Steel for Design and Construction Professionals SFIA106**

### Description:

This program will illustrate how Structural general notes and architectural specifications that are clear, correct, and up to date can play a vital role in helping avoid unnecessary delays that are costly to the owner and everyone on the design and construction team.

Learning Units: 1  
Credit Designations: LU|HSW  
Course Format: Instructor-led face-to-face

### Learning Objectives:

1. Participants will be able to articulate innovation within the cold-formed steel industry as it relates to steel framing.
2. Participants will be able to translate this innovation into clear and concise architectural specifications.
3. Participants will be able to avoid challenges during the construction phase through accurate information and communication.
4. Participants will be able to enhance quality assurance on cold-formed steel framing through architectural specifications and general notes.
